Title and Abstract

Title	Identifikasi Keterampilan Motorik Halus Anak
Abstract	<p>Tujuan dari penelitian ini adalah untuk mengetahui gambaran keterampilan motorik halus anak usia 5-6 tahun. Harapannya, hasil penelitian ini bisa dijadikan dasar dalam memberikan intervensi yang sesuai kepada peserta didik. Penelitian ini melibatkan 21 subjek pada sebuah Taman Kanak-Kanak. Identifikasi dilakukan dengan metode observasi selama 3 hari dan wawancara kepada guru, sehingga dapat dilakukan triangulasi sumber. Identifikasi keterampilan motorik dalam penelitian ini berfokus pada kegiatan berikut: menganyam, mewarnai gambar sederhana, menggambar kolase, menggunting, meniru lipatan kertas sederhana, melukis dengan jari, dan garis meniru. Kemudian, hasilnya dianalisis dengan menggunakan statistik deskriptif dengan 4 kategorisasi. Berdasarkan hasil analisis, ditemukan bahwa dari 21 anak dapat dikategorikan sebagai berikut: rata-rata 67,5% anak berada pada kategori Belum Berkembang (BB), rata-rata 28,5% anak masuk dalam kategori Mulai Berkembang (MB), kategori 4% Berkembang Sesuai Harapan (BSH), dan 0% anak berada dalam kategori Berkembang Sangat Baik (BSB). Dengan demikian, lebih dari 75% peserta didik di kelompok ini memerlukan intervensi berupa stimulasi motorik halus dengan strategi dan media yang menarik.</p>

Abstrak *

perlu dituliskan kriteria usia partisipan yang terlibat

Introduction *

Sebelum masuk ke kalimat yang menunjukkan bahwa penelitian mengenai identifikasi kategorisasi keterampilan motorik halus, sebaiknya diberikan gambaran variasi

Research Methode *

Perlu dijelaskan definisi operasional masing-masing kategori

Result & Discussion *

cukup jelas

Conclusion and Suggestion *

pada kesimpulan sebaiknya tidak terlalu banyak angka atau prosentase yang muncul, tapi lebih menjelaskan penelitian secara keseluruhan.

References *

sudah baik
