<p>Editor 2021-04-29 09:39 AM</p>	<p>DELETE Subject: [IJPHS] Editor Decision The following message is being delivered on behalf of International Journal of Public Health Science (IJPHS).</p> <hr/> <p>Dear Prof/Dr/Mr/Mrs: Solikhah Solikhah,</p> <p>We have reached a decision regarding your submission entitled "Lifestyle breast cancer patients among Indonesian women: a nationwide survey" to International Journal of Public Health Science (IJPHS), a peer-reviewed and an OPEN ACCESS journal that makes significant contributions to major areas of public health science.</p> <p>Our decision is to ACCEPT with revisions The goal of your revised paper is to describe novel technical results. A high quality paper MUST has: (1) a clear statement of the problem the paper is addressing --> explain in "Introduction"</p>

section

(2) the proposed solution(s)/method(s)/approach(es)/framework(s)/

(3) results achieved. It describes clearly what has been done before on the problem, and what is new.

In preparing your revised paper, you should pay attention to:

1. Please ensure that: all references have been cited in your text; Each citation should be written in the order of appearance in the text; The references must be presented in numbering and CITATION ORDER is SEQUENTIAL [1], [2], [3], [4],

(Please use "Search" menu under "JOURNAL CONTENT" menu in right side of the site)

2 An Introduction should contain the following three (3) parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.

- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they should proceed reading. Experience shows that for this part a few lines are often sufficient.

- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate. You should present the comparison between performance of your approach and other researches. Results given in figures should not be repeated in tables. It is very important to prove that your manuscript has a significant value and not trivial.

Please submit your revised paper within 6 weeks.

I look forward for hearing from you

Thank you

We have added with highlight in revised manuscript.

Most patients with T2DM had complications (e.g., cardiovascular, kidney disease, etc.), and its complication is the leading cause of morbidity and mortality in these patients. Screening diabetes mellitus is the primary of successful diabetes management for helping these patients to modify and reducing the risk factors of this complication. As our best our knowledge, to date, many previous studies considering diabetes screening, no reporting screening among descendants of family diabetes, especially in Indonesia.

Please ensure that all references have been cited in your text. Each citation should be written in the order of appearance in the text in square brackets. For example, the first citation [1], the second citation [2], and the third and fourth citations [3,4]. When citing multiple sources at once, the preferred method is to list each number separately, in its own brackets, using a comma or dash between numbers, as such: [1], [3], [5] or [4-8]. It is not necessary to mention an author's name, pages used, or date of publication in the in-text citation. Instead, refer to the source with a number in a square bracket, e.g. [9], that will then correspond to the full citation in your reference list. Examples of in-text citations:
This theory was first put forward in 1970 [9]."
Bloom [10] has argued that...
Several recent studies [7], [9], [11-15] have suggested that....
...end of the line for my research [16].....

In order to cover part of the publication cost, each accepted paper is charged: USD 215 (~IDR 3000K). This charge is for the first 8 pages, and if any published manuscript over 8 pages will incur extra charges USD 50 (~IDR 700K) per page

The payment should be made by bank transfer (T/T):

Bank Account name (please be exact)/Beneficiary: LINA HANDAYANI
Bank Name: CIMB NIAGA Bank
Branch Office: Kusumanegara Yogyakarta
City: Yogyakarta
Country : Indonesia
Bank Account #: 760164155700 (formerly: 5080104447117)
