Dear Prof/Dr/Mr/Mrs: Assalamu'alaikum... Suci musvita ayu,

We have reached a decision regarding your submission entitled "PHENOMENOLOGICAL STUDY OF RISKY TEENAGER BEHAVIOR IN VOCATIONAL HIGH SCHOOL "A" IN YOGYAKARTA" to International Journal of Evaluation and Research in Education (IJERE), an ERIC indexed journal (<https://bit.ly/2EI8hDj>).

Our decision is to ACCEPT Major with revisions

- Extend the paper with 10 up to date international journal papers
- Re write adhere IJERE Template carefully
- Proof read the English to professional
- Explain regarding data triangulation in method section
- Explain Ethical clearance
- write the location as : "A VOCATIONAL SCHOOL"

You need Bahasa Indonesia version in ABSTRACT AND TITLE

The goal of your revised paper is to describe novel technical results.

A high quality paper MUST has:

- (1) a clear statement of the problem the paper is addressing --> explain in "Introduction" section
- (2) the proposed solution(s)/method(s)/approach(es)/framework(s)/algorithm(s) ....
- (3) results achieved. It describes clearly what has been done before on the problem, and what is new.

In preparing your revised paper, you should pay attention to:

1. Please ensure that: all references have been cited in your text; Each citation should be written in the order of appearance in the text; The references must be presented in numbering and CITATION ORDER is SEQUENTIAL [1], [2], [3], [4], .....

Please download & study our published papers for your references:

- <http://iaescore.com/journals> (other journals)

(Please use "Search" menu under "JOURNAL CONTENT" menu in right side of the site)

2 An Introduction should contain the following three (3) parts:

- Background: Authors have to make clear what the context is. Ideally, authors should give an idea of the state-of-the art of the field the report is about.
- The Problem: If there was no problem, there would be no reason for writing a manuscript, and definitely no reason for reading it. So, please tell readers why they

should proceed reading. Experience shows that for this part a few lines are often sufficient.

- The Proposed Solution: Now and only now! - authors may outline the contribution of the manuscript. Here authors have to make sure readers point out what are the novel aspects of authors work. Authors should place the paper in proper context by citing relevant papers. At least, 5 references (recently journal articles) are used in this section.

3. Results and discussion section: The presentation of results should be simple and straightforward in style. This section report the most important findings, including results of statistical analyses as appropriate. You should present the comparison between performance of your approach and other researches. Results given in figures should not be repeated in tables. It is very important to prove that your manuscript has a significant value and not trivial.

Please submit your revised paper within 6 weeks.

I look forward for hearing from you

Thank you

First of all, the study should be organized in accordance with iaes format, especially the introduction section should be developed. In addition, the references used should be reviewed they are inadequate. References should be corrected. Tables should be prepared in accordance with the format.

In addition, attention should be paid to grammar and the correct spelling of words and sentences. If the study is carefully edited and developed, it is of publishable quality.
