Decision Letter (NAH-21-0485)

From: nauman.khalid@umt.edu.pk
To: mustikanirmala@mail.ugm.ac.id
CC:
Subject: Nutrition and Health - Decision on Manuscript ID NAH-21-0485
Body: 21-Feb-2022

Dear Ms. Dewinta:

Manuscript ID NAH-21-0485 entitled "Barriers and potential facilitators to implement nutrition care program in athletes' training centers in Indonesia" which you submitted to Nutrition and Health, has been reviewed. The comments of the reviewer(s) are included at the bottom of this letter.

The reviewer(s) have suggested major revisions to your manuscript, as detailed below. Please respond to the reviewer(s)' comments and revise your manuscript, providing a point by point list of corrections and/or rebuttal comments. Please note, that resubmission does not guarantee final acceptance in the journal.

To revise your manuscript, log into <https://mc.manuscriptcentral.com/nah> and enter your Author Center, where you will find your manuscript title listed under "Manuscripts with Decisions." Under "Actions," click on "Create a Revision." Your manuscript number has been appended to denote a revision.

You may also click the below link to start the revision process (or continue the process if you have already started your revision) for your manuscript. If you use the below link you will not be required to login to ScholarOne Manuscripts.

*** PLEASE NOTE: This is a two-step process. After clicking on the link, you will be directed to a webpage to confirm. ***

https://mc.manuscriptcentral.com/nah?URL_MASK=043f261508db48e0be18377e78253a40

You will be unable to make your revisions on the originally submitted version of the manuscript. Instead, revise your manuscript using a word processing program and save it on your computer. Please also highlight the changes to your manuscript within the document by using bold or colored text.

Once the revised manuscript is prepared, you can upload it and submit it through your Author Center.

When submitting your revised manuscript, you will be able to respond to the comments made by the reviewer(s) in the space provided. You can use this space to document any changes you make to the original manuscript. In order to expedite the processing of the revised manuscript, please be as specific as possible in your response to the reviewer(s).

IMPORTANT: Your original files are available to you when you upload your revised manuscript. Please delete any redundant files before completing the submission.

Because we are trying to facilitate timely publication of manuscripts submitted to Nutrition and Health, your revised manuscript should be uploaded as soon as possible. If it is not possible for you to submit your revision in a reasonable amount of time, we may have to consider your paper as a new submission.

Once again, thank you for submitting your manuscript to Nutrition and Health and I look forward to receiving your revision.

Sincerely,
Dr. Nauman Khalid
Editor-in-Chief, Nutrition and Health

Comments to the Author

General: This article addresses an important issue, that is likely to be of interest to readers of this journal. However there were several concerns and major revisions required before this should be published.

Please find attached a document with detailed comments of specific changes I recommend to the manuscript. However below are a few key issues to be addressed.

The term 'nutrition care' seems odd, I would think 'sports nutrition support' maybe more relevant.

The introduction needs to provide a more detailed overview of the literature with regards to why this is a problem for athletes. Stating 'nutrition problems/ imbalances' does not provide a strong enough argument for the need for an intervention.

The methods section requires significant development and the specifics of this are covered in my attached document.

While the discussion attempts to interpret the results it needs expanding. Furthermore frequently the author tends to steer of direction. Hence, make sure that every statement you write in your discussion you ensure that it meets the following;
'a concise summary of the problem you have identified and a critical discussion of the findings in the context of the relevant literature'.

There is no limitations and future directions section - this is needed.

Lastly the conclusion needs to relate back to the aims and objectives providing a clear and concise summary of what was found, and what this means moving forward.

There are several grammar and sentence structure issues that need attention throughout.

With some major revisions I would see this as an appropriate paper to be published in this journal.
