sgy sugiyarto - surono:

Thank you for submitting the manuscript, "Fuzzy subtractive clustering (FSC) with exponential membership function for heart failure disease clustering" to International Journal of Artificial Intelligence Research. With the online journal management system that we are using, you will be able to track its progress through the editorial process by logging in to the journal web site:

Manuscript URL: <https://ijair.id/index.php/ijair/author/submission/306>  
Username: sugiyarto

If you have any questions, please contact me. Thank you for considering this journal as a venue for your work.

Heri Nurdianto

We have reached a decision regarding your submission to International Journal of Artificial Intelligence Research, "Fuzzy subtractive clustering (FSC) with exponential membership function for heart failure disease clustering".

Our decision is: Revisions Required

Heri Nurdianto  
STMIK Dharmawacana  
Phone +6285766661199  
[internationaljournalair@gmail.com](mailto:internationaljournalair@gmail.com)

Reviewer A:

Significance: - How important is the work reported? Does it attack an important/difficult problem (as opposed to a peripheral/simple one)? - Does the approach offer to advance the state of the art? - Does it involve or synthesize ideas, methods, approaches from multiple disciplines? - Does it have interesting implications for multiple disciplines?:

it describe clearly the methods employed (e.g., experimental procedures, algorithms, analytical tools), if any? - Are the results, if any, described and evaluated thoroughly? - Is the paper organized in a sensible and logical fashion? \*\*: Good

Relevance: - Is the paper closely related to the theme of the journal (broadly conceived)? - Is the content interesting enough to a broad audience? - Is the paper readable in a multi-disciplinary context \*\*: Good

Explanations for the above ratings and other general comments on major issues \*\*: Introduction: I did not find a research gap and novelty

Result and Discussion:  
 Heart failure is not explained in the Introduction. I thought it only discussed fuzzy, so I didn't find anything new. This study examines cases of heart failure. Therefore, it is better in the Introduction to explain the issue, the case's research gap, and the case's novelty based on Fuzzy.

Where is the discussion part? What do you want to explain about Fuzzy and its relation to Heart failure?

Conclusions: Because it uses the case of heart failure, there must also be a

Explanations for the above ratings and other general comments on major issues \*\*:

Abstract

1. Kindly you should write the contribution sentence after the AIM, to show your novelty
2. It is better if you can add the result (quantitatively) in this abstract to show to your reader your final result
3. Please add implication of this study in the last paragraph

Introduction

1. Author has written the state of the art method, however, author should write what have not done in each previous method thus we will know the RESEARCH GAP in this area of research.
2. In the last paragraph, author should write the AIM and the justification

METHOD

1. Equation 1 and 2 should be mentioned in the TEXT. Author should explain for each variabel for each equation (where x indicate.)
2. Every main equation should be supported by a references this is to verify the corectness of the equation
3. Author should explain not only theoretical background of the method BUT author should explaine about the dataset
4. Author should explain the data analysis as well as statistical

RESULT

2. Every main equation should be supported by a reference this is to verify the correctness of the equation

3. Author should explain not only theoretical background of the method BUT author should explain about the dataset

4. Author should explain the data analysis as well as statistical

RESULT

1. Is there any euclidian distance (ED) method applied in this study?. This is to measure which clustering technic better among others

2. Figure 1, 2, 3 should be explained (label) for the X axis

3. Figure 4 should be completed with the label and unit (X and Y axis)

Discussion

1. This paper lack of discussion section

2. Author should add this section for better quality paper

3. Author can add Interpretation, study comparison among other related study, the weaknesses and implication

Conclusion

1. Author should write the AIM, FINDING and FUTURE WORK

Comments on the minor details of the article:

Author should revise the paper for better quality paper

sgy sugiyarto - surono:

We have reached a decision regarding your submission to International Journal of Artificial Intelligence Research, "Fuzzy subtractive clustering (FSC) with exponential membership function for heart failure disease clustering".

Our decision is to: Accept Submission

Article processing charges (APCs) / Article Publication Fee: 200.00 (USD)  
 This journal charges the article publication fee for supporting the cost of wide-open access dissemination of research results, managing the various costs associated with handling and editing of the submitted manuscripts, and the Journal management and publication in general, the authors or the author's institution is requested to pay a publication fee for each article accepted. The fee covers :

The standard of the first twelve (12) pages manuscript. For every additional page, an extra fee of 10 USD per page will be charged.  
 DOI registration for each paper.  
 Checking the article similarity by iThenticate; the final result will be
