MANUSCRIPT DETAILS

TITLE: Knowing the unknown medicinal benefits of *Punica granatum* - A Short Review.
ABSTRACT: Ayurvedic medications for various ailments have withstood the test of time since time immemorial. A wide variety of plants possess the enormous treasures of medicinal value and have been used for both systemic and oral ailments. Recently there has been a renewed interest in the use of various ayurvedic drugs for oral health. *Punica granatum*, which belongs to the Punicaceae family and is commonly called a "pomegranate,". According to researches, various extracts of pomegranate peels have been found to contain a broad range of phytochemicals. Pomegranates and their compounds have been suggested as a healthy substitute treatment for a variety of ailments. The combinatorial characteristics of these substances are much greater than the efficiency of the separate components. Pomegranate fruit has been shown to have antioxidative and anti-inflammatory properties. Ellagitannins is one of the most essential bioactive constituents, may combine with the intestinal microbiota and impact its metabolic activity. Certain pathogens, such as Clostridia species, Staphylococcus aureus, and Pseudomonas aeruginosa, have already been demonstrated to be inhibited by punicalin and punicalagin. Pomegranate is quickly gaining popularity as an antioxidant booster, antioxidants extracted from pomegranate are polyphenols, hydrolyzable tannins, and anthocyanins. The extracts were proven to be effective over several bacteria, methicillin-resistant and methicillin-sensitive Streptococcus aureus, E. coli, Salmonella typhi, and other streptococci. Many studies have also shown positive results and more are still on the go. Even though there is a lot of information for antioxidant, antibacterial, anti-inflammatory, and antifungal activities, additional clinical trials are required to explore the unexplored properties of this fruit.
KEY WORDS: Pomegranate, Plaque, Anti-inflammatory, Mouthrinse

REVIEWER EVALUATION FORM

Title: **Knowing the unknown medicinal benefits of *Punica granatum*- A Short Review**

I have read the above manuscript and give hereafter my comments:

The manuscript by ...no information ...is focusing Herbal medicine: *Punica granatum* (A short review)

1°/ **consistency with the journal profile**

~~non-consistency with the journal profile~~

2°/ ~~a manuscript is based on extensive study with proper controls~~

a manuscript is not based on extensive study with proper controls

3°/ ~~the information concerning the identification and documentation of plants is included~~

the information concerning the identification and documentation of plants is not included

4°/ **the information concerning medicinal use of the plant is clarified**

~~the information concerning medicinal use of the plant is not clarified~~

5°/ ~~the approach to the subject is innovative~~

the approach to the subject is not innovative

6°/ in the article based on animal or clinical studies written approvals of Ethics/Bioethics Committee is cited

~~in the article based on animal or clinical studies written approvals of Ethics/Bioethics Committee is not cited~~

7°/ **the article is written carefully**

~~the article is written carelessly~~

8°/ Language of the paper:

excellent

good

need corrections

9°/ **the article is written according to the ‘Instructions to Authors’**

the article is not written according to the ‘Instructions to Authors’

These following concerns need to be addressed:

I. Major errors:

1. I don't think the abstract of this manuscript is suitable for publication in this form/stage.
2. Less coherency is shown in the title, introduction, discussion, and conclusion.
3. Major rewriting is needed to ensure the article is written using a more academic writing style, for example, minimizing vague words such as the word "unknown" in the title.
4. The statement "Pomagranate has a spectacular gift of nature" is not based on the search results of articles compiled in the results and discussion. Moreover, clear parameters are not shown in the results of the review.

II. Minor errors:

1.
2.

Concluding,

- **I recommend this paper for publication in *Herba Polonica* after strong revision and inserting the above-mentioned changes in the manuscript**
- I agree to evaluate the revised body text of the paper
- I do not recommend this paper for publication in *Herba Polonica*
- I recommend this paper for publication in *Herba Polonica* after minor revisions
- I recommend this paper for publication in *Herba Polonica* without any changes
