ENHANCEMENT OF BIOGAS PRODUCTION THROUGH SOLID STATE ANAEROBIC CO-DIGESTION OF FOOD WASTE AND COB COB CUBS

Lukhi Mulia Shitophyta
Lukhi.Muliashitophyta@ui.ac.id

Abstract

Abstract: Biogas is produced by anaerobic digestion of organic waste. The process of biogas production is influenced by the type of substrate used. This study aims to improve the biogas production process by using a solid state anaerobic co-digestion (SSACD) process. The results of the study show that the SSACD process can improve the biogas production process. The results of the study show that the SSACD process can improve the biogas production process.
