Reviewer A:

Does the paper contain an original contribution to the field?:
Yes

Is the paper technically sound?:
Yes

Does the title of the paper accurately reflect the major focus contribution of this paper?:
Yes

Please suggest change of the title as appropriate (if any):

Is the abstract a clear description of the paper?:
Yes

Is the paper well written (clear, concise, and well organized)?:

Yes

Are the equations, figures and tables in this journal style, clear, relevant, and are the captions adequate?:

Yes

Please score the paper on a scale of 0 - 10 as per the directions below:

:

5-6 Average

Please write down your suggestion to improve this manuscript:

In the discussion section, it is still necessary to deepen the relationship between patient characteristics and unused medicine disposal practices.

Reviewer B:

Does the paper contain an original contribution to the field?:

Yes

Is the paper technically sound?:

Yes

Does the title of the paper accurately reflect the major focus contribution of this paper?:

Yes

Please suggest change of the title as appropriate (if any):

-

Is the abstract a clear description of the paper?:

Yes

Is the paper well written (clear, concise, and well organized)?:

No

Are the equations, figures and tables in this journal style, clear, relevant, and are the captions adequate?:

Yes

Please score the paper on a scale of 0 - 10 as per the directions below:

:

7-8 Good

Please write down your suggestion to improve this manuscript:

mohon dicek kembali istilah yang lazim digunakan (cek literatur FDA: Where

and How to Dispose of Unused Medicines), metode dilengkapi kritrian inklusi dan eklusi, teknik pengambilan sampel dan minimal sampel. tulis makna dari hasil analisa, jika tidak signifikan berikan penjelasan, dipembahasan ditambah Apa peran apoteker dalam upaya memberikan info yg benar trkait unused medicine disposal practice

In the discussion section, it is still necessary to deepen the relationship between patient characteristics and unused medicine disposal practices.

Answer: We are grateful to the Reviewer for the positive review and assessment of our study.

We have added in the discussion section of the last paragraph

Age, gender, socioeconomic level have a role in determining individual attitudes and behaviour. Age determines the maturity of thinking, Education is one of the things that affect the mindset, so it is true that individual characteristics have a major influence on behavior in this case is the behavior of handling unused drugs. This is in line with Notoatmojo's opinion (2012) maintenance behavior depends entirely on knowledge, education, understanding, awareness and willingness in decision making. Increasing age also affects behavior change The process of adult education is generally more varied , because adults already have knowledge, attitudes and skills that have been possessed for years. This condition requires the role of pharmacists as agents of change in providing education to the public about how to manage well. This effort can also be carried out as a suggestion for more in-depth research on the impact and role of pharmacists in increasing public awareness related to the management of unused medicine

We have adjusted it to the term WHO and we have made changes Using the term unused medicine

We have added it in the RESEARCH METHDOLOGY

Respondents of this study have met several criteria between being at least 16 years old, having taken medication and having had drugs that have not been used. Respondents who do not fill information with lenhgkap and will obviously be excluded from this research activity. Respondent data was collected by purposive technique and the number of respondents involved was 45.
