Dear Feri Budi Setyawan

Thank you very much for submitting your manuscript to HRPUB.  
In order to expedite the publication process, your manuscript entitled "Use of the Game as a strategy in strengthening the role of physical education teachers to improve the manipulative motion skills of elementary school students" has been sent out to evaluate. But some problems still need further revision.  
We would be grateful to you if you could revise your manuscript according to the following comments:

1. The abstract in your manuscript is short. The abstract should be written as a continuation paragraph with 200-350 words and recapitulate the background of the research, purposes, methodologies, principal results, major conclusions and its contributions to the field. It should emphasize new or important aspects of the study. Research limitations/implications, practical implications, and social implications should also be included, if relevant to your manuscript.
2. Tables 1-6 are not mentioned in the text.

\*Please highlight the changes you have made.

Kindly respond to the evaluation and send your revised manuscript to [pcrawford@hrpub.com](mailto:pcrawford@hrpub.com) as soon as possible. Please track status of your manuscript through the Online Manuscript Tracking System.

We will contact you again once a new decision is made on your manuscript. You will expect a review report from Anthony Robinson ([arobinson@hrpub.com](mailto:arobinson@hrpub.com)) in the following 45 days. Peer review reports are also downloadable in Online Manuscript Tracking System (<http://www.hrpub.org/submission/login.php>) once the review process is completed.

The author will need to pay for the Article Processing Charges after the manuscript is accepted by the Editorial Board.  
For the charging standard, please refer to [http://www.hrpub.org/journals/our\\_charges.php?cid=1](http://www.hrpub.org/journals/our_charges.php?cid=1).

Please feel free to contact us if you have any questions. Besides, could you please leave us an alternate Email Address in case?

For more information, please visit the journal's homepage.  
Guidelines: [http://www.hrpub.org/journals/our\\_guidelines.php?cid=1](http://www.hrpub.org/journals/our_guidelines.php?cid=1)

Please acknowledge receipt of this email.

Best Regards

Chloe Crawford  
Editorial Assistant

### Acceptance Letter

Dear Feri Budi Setyawan,

Congratulations! As a result of the reviews and revisions, we are pleased to inform you that your following paper has been accepted for publication.

Paper Title: The Use of Game as a Strategy in Strengthening the Role of Physical Education Teachers to Improve the Manipulative Motion Skills of Elementary School Students

Paper ID: 19922433

Contributor (s): Feri Budi Setyawan, Suharyana, Ria Lumintuarso

It is scheduled for publication on International Journal of Human Movement and Sports Sciences, Vol.9, No.3.

The publication fee \$ 480 should be paid within 2 weeks.

Should you have any questions, please feel free to let us know by quoting your **Paper ID** in any future inquiries.

Best wishes,

**ABSTRACT**

The physical education teachers' active role also affects the low level of elementary school students' movement skills. The aim of the study was to find out the game strategies in strengthening physical education teachers' role to improve students' manipulative motion skills selection for upper-class elementary school students because of the ease of research and conformity of research purposes. The research was conducted at the public elementary school and it was located in the Ngemplak sub-district. The researcher developed the instrument relevant of manipulative game instrument to measure elementary school students' manipulative skills; the instrument was more focused on manipulative assessment (throwing, catching, and kicking). The study used an experimental quasi-design, consisting of 48 upper-class students divided into control groups and experimental groups. This study was conducted in five elementary schools in Ngemplak Subdistrict. Manipulative motion skills tests were given as pre-tests and post-test. To analyze the data, independent and paired t-tests were used at a .05 significance level. The results showed that the experimental group students had higher scores on both dependent variables than the control group. This suggests that manipulative play significantly improves the experimental group of manipulative motion skills compared to students in the control group.
