PROBLEMS OF ASSESSMENT IN THE AI ERA

Dra. Umi Rokhyati, M.Hum.³²
(Universitas Ahmad Dahlan Yogyakarta)

“AI is very helpful, effective, and efficient in accomplishing a task. However, teachers have problems when assessing students’ tasks”

Artificial Intelligent (AI) is with us now. It cannot be ignored or avoided. It gives many eases to all of us. It helps us in finishing our task fast. It can do work that is difficult, hard, or dirty that people cannot do or avoid to do. Robot is one of the examples of AI. Now, AI also exists in a form of application. This application can do many jobs. Even it can create a song, an article, and many more jobs.

What is AI? The first term was defined in 1955 by John McCarthy by explaining the goal of AI that was to develop machines that behave as though they were intelligent (Ertel,
