Reviewer A:
This article makes a significant contribution to the field of vocational education in terms of entrepreneurship. This article is supported by clear arguments and strong statistical analysis so it is worthy of publication. It would be better if the research variables were increased.
In further research, psychological or environmental factors need to be added because they can also influence interest in entrepreneurship. Apart from that, qualitative studies can also be carried out to examine entrepreneurship more deeply.

Reviewer B:
Look at the review result file.
