To: Elinda <elinda2000018033@webmail.uad.ac.id>, Herman Yuliansyah <herman.yuliansyah@tif.uad.ac.id>, Muhammad Iqbal Abu Latiffi <eiqbal.latiffi@gmail.com>

Elinda, Herman Yuliansyah, Muhammad Iqbal Abu Latiffi:

We have reached a decision regarding your submission to International Journal of Advances in Data and Information Systems, "Sentiment Analysis of the Sheikh Zayed Grand Mosque's Visitor Reviews on Google Maps Using the VADER Method".

Our decision is: Revisions Required

Reviewer A:Recommendation: Revisions Required

Significance: - How important is the work reported? Does it attack an important/difficult problem (as opposed to a peripheral/simple one)? - Does the approach offered advance the state of the art? - Does it involve or synthesize ideas, methods, approaches from multiple disciplines? - Does it have interesting implications for multiple disciplines? *

Fair

Originality: - Is this a new issue? Is this a novel approach to an issue? - Is this a novel combination of familiar ideas/techniques/methods/approaches? - Does the paper point out differences from related research? - Does the paper properly situate itself with respect to previous work? *

Fair

Quality: - Is the paper technically sound? How are its claims backed up? - Does it carefully evaluate the strengths and limitations of its contribution? *

Fair

Clarity: - Is the paper clearly written? Does it motivate the research? Does it describe clearly the methods employed (e.g., experimental procedures, algorithms, analytical tools), if any? - Are the results, if any, described and evaluated thoroughly? - Is the paper organized in a sensible and logical fashion? *

Fair

Relevance: - Is the paper closely related to the theme of the journal (broadly conceived)? - Is the content interesting enough to a broad audience? - Is the paper readable in a multi-disciplinary context? *

Fair

Technical (1): Structure of the paper *

Fair

Technical (2): Standard of English *

Fair

Technical (3): Appropriateness of abstract as a description of the paper *

Fair

Technical (4): Use and number of keywords/key phrases *

Fair

Technical (5): Relevance and clarity of drawings, graphs and tables *

Fair

Technical (6): Discussion and conclusions *

Fair

Technical (7): Reference list, adequate and correctly cited *

Fair

Explanations for the above ratings and other general comments on major issues

Clarity of Methodology: The methodology is well-described, particularly in outlining the two phases of research and the steps taken in each phase. However, it would be beneficial to provide more details on the selection of the public datasets used in the first phase of the research and how they relate to the specific context of mosque visitor reviews.

Model Development: The use of a combination of VADER and Deep Translator methods for sentiment analysis is innovative. Providing more insight into how these methods were integrated and their respective contributions to the final sentiment analysis model would enhance the understanding of the approach.

Evaluation Metrics: The evaluation results presented are comprehensive, including accuracy, precision, recall, and F1-Score. However, it would be helpful to elaborate on how these metrics were calculated and interpreted, especially for readers less familiar with sentiment analysis evaluation.

Preprocessing Models: The comparison of two preprocessing models (PPTV1 and PPTV2) is valuable for understanding the impact of preprocessing on sentiment analysis results. It would be beneficial to provide more detail on the differences between these preprocessing models and their rationale for selection.

Sentiment Analysis Results: The sentiment analysis results of visitor reviews are summarized effectively, indicating a predominantly positive sentiment towards the mosque's beauty and majesty. However, it would be useful to include examples or excerpts from positive and negative reviews to illustrate the sentiments expressed more vividly.

Interpretation of Findings: The analysis findings are straightforward, highlighting the overall positive perception of the mosque among visitors while acknowledging some negative reviews regarding facilities. It would be insightful to delve deeper into the specific aspects of facilities that receive criticism and explore potential implications for mosque management or improvement efforts.

Limitations and Future Research: Discussing the limitations of the study, such as potential biases in the selection of datasets or the reliance on machine translation, would add transparency and depth to the research. Additionally, suggesting avenues for future research, such as investigating the impact of sentiment on visitor satisfaction or conducting qualitative analysis of specific themes in visitor reviews, would enrich the discussion.

Conclusion: The conclusion effectively summarizes the key findings of the research. Consider emphasizing the practical implications of the findings for mosque management or tourism promotion in Solo to enhance the relevance of the study's contribution.

Dear Editor,

On behalf of the authors, I would like to thank you for the opportunity and your feedback to review our manuscript. We have considered several review results and input from the review and corrected them in the manuscript. Below, I am sending the revised manuscript file and the response to the reviewer file to make it easier for reviewers/editors to review the revised manuscript. I also uploaded this file to the OJS system.

Thank You.

International Journal of Advances in Data and Information Systems <info@ijadis.org> 22 April 2024 at 20:36
To: elinda2000018033@webmail.uad.ac.id, herman.yuliansyah@tif.uad.ac.id, eiqbal.latiffi@gmail.com

Dear Prof/Dr/Mr/Mrs. Elinda, Herman Yuliansyah, Muhammad Iqbal Abu Latiffi,

Congratulations!!

Your paper entitled "Sentiment Analysis of the Sheikh Zayed Grand Mosque's Visitor Reviews on Google Maps Using the VADER Method", ID Number: 1320, authors: Elinda, Herman Yuliansyah, Muhammad Iqbal Abu Latiffi, for International Journal of Advances in Data and Information Systems (IJADIS) has been ACCEPTED and will be published in the forthcoming issue.

In order to cover part of the journal cost, each accepted paper will be charged: 750,000.00 (IDR)

This article publication is to support the cost of wide open access dissemination of research results, to manage the various costs associated with handling and editing of the submitted manuscripts, and to manage journal management and publication in general, the authors or the author's institution is requested to pay a publication fee for each article accepted.

The payment should be made by bank transfer (T/T):

Bank Account name (please be exact)/Beneficiary: NUNUH DESTRI FIDYA RESTITI
Bank Name: Bank Central Asia (BCA)
Bank Account No: 3370987440
City: Bandung
Country: Indonesia

For your information, according to international regulations, the similarity score of camera-ready paper should be less than 25%. A single author is NOT allowed. The Editor(s) will check whether the final version has been performed and already addresses the reviewers' comments or not. Failing to do proper revisions may lead to the rejection of your paper.

Please send your payment receipt to: info@ijadis.org within 1 week.

I look forward for your response

Sincerely yours,

Editor-in-Chief,
International Journal of Advances in Data and Information Systems (IJADIS)
