Dear Rahmat Hidayat,

Thank you for submitting the manuscript, "Generalized Normalized Euclidean Distance Based Fuzzy Soft Set Similarity for Data Classification" to CMC-Computers, Materials & Continua. For some reasons, we have decided to transfer your article to another journal. Please log in to your account to decide whether to change the journal. If you accept the transfer, the paper will enter the review process of the suggested journal automatically. If you disagree with transfer, you should choose decline in the submission system, the paper will be declined automatically.

Dear Rahmat Hidayat,

The review of your submission to Computer Systems Science and Engineering

ID: 15628 , 'Generalized Normalized Euclidean Distance Based Fuzzy Soft Set Similarity for Data Classification' has been completed.

Although we found that your paper has merit, it is not acceptable to publish in its present form. We invite you to revise your paper to address reviewers' comments as fully as possible. Please revise the manuscript according to the reviewers' comments and upload the revised file within ten days.

When you submit your revision, please upload the following 3 files:

Your response letter to the comments of reviewers;  
Your revised paper with track change;  
Your clean revised paper.

Please find the reviewer's comments at the end of this message. When uploading your revision files, scrolling down the page, you will find a panel for Revisions. Use the Revision Panel to upload your revised manuscript.

As authors, you have the right to refuse to use the unrelated citations recommended by the reviewers or relevant personnel. Authors are encouraged to report this issue directly to the editorial office of Computer Systems Science and Engineering in a timely manner once it is occurred.

Thank you very much for your contributions to Computer Systems Science and Engineering.

Sincerely,

Computer Systems Science and Engineering

The authors said that "computational experiment show that the proposed approach is able to improve up to 10.3436 % and 6.9723 % in term of accuracy and recall". What the means of these arguments? Is it good or not?

Is there any research that supports this claim?

**Reviewer 2**

The paper is good but:

- the authors not explain using secondary data or simulation data in computational experiment.
- the authors not making figure interpretation

**Reviewer 3**

Please revise your paper in the following parts.

1. Please use the new Computer Systems Science and Engineering (CSSE) template for your paper. You can download it in the CSSE website. In the new CSSE template, there is page header which shows Computer Systems Science and Engineering template of Tech Science Press and the paper's doi number and type etc.

2. Only the initial letter of the first keyword should be capitalized except Proper Nouns.

3. Your Citing References are in the wrong order.

Note: Citing References in the main text should be arranged in order from number [1].

E.g. In your paper, you cite Reference [18] after Reference [16], you should cite Reference [17] after Reference [16], then you can cite Reference [18].

4. Regarding Headings including Level one, two and three headings, the initial letter of each notional word of the Headings should be capitalized. All the headings should be flushed to the left margin.

E.g. In Section 3.1.1, 3.1.2, *step* should be *Step*.

5. **Your sections should be numbered in order. So after Section 3, you should have Section 4, not Section 5.**

6. In the main text, if you reference the Figures and Tables, please use abbreviation "Fig." and "Tab." respectively followed by the numbers, e.g., Fig. 1. and "Tab. 1" respectively. Please modify corresponding parts in your paper.

7. A mathematic equation should be aligned to the left margin of the column. The mathematic equation's number should be right margin aligned. Please make sure your mathematic equation should be not a picture and should be editable.

8. Most of your references are not in the right format, please use the CSSE new format.

a. Regarding a paper title in a journal or a conference, only the initial letter of the first word except the Proper Nouns should be capitalized, but the journal or conference name should be full and italic. Please provide the full name of the journal. E.g. Reference 1, 2, 3, ...

b. There should be a word "and" between the last 2 authors or editors. There is no comma ", "before the word "and". E.g. Reference 1-4, ..., 26.

c. You are required to provide the authors' name, the paper title's name, volume number, issue number, page number and published year as many as possible as the format: vol. xx, no. xx, pp. xx-xx, published year. Do not use the format as Vol. xx, No. xx, PP. xx-xx or 3(4), 306, (2020). The published year should be put at the end of the reference.

### Examples format for journals:

- [1] X. Chen and J. H. Jiang, "A method of virtual machine placement for fault-tolerant cloud applications," *Intelligent Automation & Soft Computing*, vol. 22, no. 4, pp. 587–597, 2016.

\* English:

English should be revised and corrected. It is inadequate for publishing  
Most of the errors have to do with structural, grammatical or syntax issues.

**Reviewer 2**

Please revise your paper in the following parts.

1. There are more than one authors in your paper, so please use the authors instead of the author(s) in Funding Statement.
2. Most of your references are not in the right format, please use the CSSE new format.
  - a. Regarding a paper title in a journal or a conference, only the initial letter of the first word except the Proper Nouns should be capitalized. E.g. Reference 1, 5, 21, 23.
  - b. There should be a word "and" between the last 2 authors or editors. There is no comma "," before the word "and". E.g. Reference 26.

\* Abstract:

- Need to be revised and expanded: Abstract of a research paper is typically 200 to 400 words in length, and 150 to 300 words for a review paper.

\* Abbreviations

- ALL Abbreviations should be defined in full the first time they appear in the abstract, main text, and figure or table captions (Including title).

\* English

Dear authors,

Thank you for all your revisions.

The English in this paper is still highly inadequate for publishing.

This is the 3rd revision regarding the English in your manuscript. Please refer to the previous comments.

Let us know how else we can help to get you where you need to be with your paper.

Dear Rahmat Hidayat,

We are pleased to inform you that the following paper has been officially accepted for publication:

ID: 15628  
"Generalized Normalized Euclidean Distance Based Fuzzy Soft Set Similarity for Data Classification"

All articles in Computer Systems Science and Engineering are published in printed and online version. An article processing charge (APC) is applied to every article. The authors are requested to pay an article processing charge (APC) of \$1,000 US dollars per processed paper. For articles in excess of 15 pages, a mandatory page charge of \$100 US dollars per extra page will be required beyond 15 pages. Rejected articles are free of charge.

The APC of your article is: \$1000USD. Total payment is due in 10 days.

There are two options to pay the charge:

1) Wire Transfer

Article Processing Charge (APC): \$1000 USD

Transfer Charge: \$30 USD

Total Amount : \$1030 USD

If you choose the payment by wire transfer, please use the information below and include your paper ID on the reference of payment. Then you need to send the payment receipt to our official email account ([invoice@techscience.com](mailto:invoice@techscience.com)).

Name of the Bank: Bank of America  
Address: NV106-01-01, 1100 N. Green Valley Pkwy, Henderson, NV 89074, USA  
Swift Code: BOFAUS3N
