Reviewer 1:

What not same university, public or private from two country? Any reason? If just focus student from university, maybe you can say university in Yogya and Pahang, not need use private and public

Author response:

Thank you for your suggestion. We delete the word private and public in abstract for more focus in university students.

Reviewer 1:

Before explain about self-control, please give bridge sentence

Author response:

We have added bridge sentence before self control paragraph. Thank you.

Reviewer 1:

Self control to emotional regulation? Self control-smartphone use-homophobia? Emotional regulation-smartphone use-nomophobi? Are there no include?

Author response:

We have included all hypotheses as per the study model. We added seventh hypotheses that explain the role of smartphone use as mediator.

Reviewer 1:

all respondents indicate Nomophobia? For smartphone use, what scale?

Author response:

We have added an explanation of the smartphone use scale used in this study. The Nomophobia scale was used to assess the tendency of nomophobia. The measurement results will indicate the level of nomophobic behavior of the respondents.

Reviewer 1:

According to?

Author response:

This sentence explains and emphasize the result of this study

Reviewer 1:

Please explain as Answer the question research

Author response:

We have explained according to research question of this study.

Reviewer 2:

Mention the instruments used in this research

Author response:

We have added the questionnaire used

Reviewer 2:

Population criteria and determination of numbers and sampling techniques have not been mentioned here

Author response:

We have added population criteria and determination of numbers and sampling techniques in the abtsract More detail explanation about this issu, we explained in the method section

Reviewer 2:

Reduce previous research that is less relevant to this research. Such as the relationship between self-control and other than smartphones/internet use/nomophobia.

Author response:

Thank you for your suggestion. We deleted the sentence that was not relevant

Reviewer 2:

The main problem of this research is less clear. Is the problem that smartphone use can cause addiction? Or nomophobia? Authors are expected to be able to filter carefully which theoretical information can be used as a reference or not.

Author response:

We deleted this sentence as not much relevant to the study.

Reviewer 2:

At first glance, this title would be more appropriate if it placed self-control as a mediator variable

Author response:

We assume that low self-control will increase person smartphone use, so this argument become our study model

Reviewer 2:

Apakah dilakukan uji etik di Malaysia? Jika tidak, uraikan alasannya

Author response:

Tim peneliti dari Malaysia mengacu pada hasil uji etik riset yang dilakukan di Jogja, dengan alasan memiliki protokol dan desain riset yang sama, yang akan diterapkan di Pahang Malaysia.

Reviewer 2:

These three scales only go through an iterative translation process, is there a forward and backward translation process? These scales also do not explain the existence of an expert review stage (content and construct validity). Provide a more complete explanation regarding this.

Author response:

We have added more explanation regrading this issue. Thank you for your suggestion.

Reviewer 2:

All three scales adapted? Why not use factor analysis in scale adaptation/modification? (CFA model). Then for the smartphone used, is it a tool for extracting nominal data? Give an explanation regarding this.

Author response:

We have added explanation about smartphone use scale. We also include CFA test for all scale.
