Dear Editors,  
 Thanks for the kindly email.  
 There are few corrections was found. **Only figure 2 and 3 legend had been stated incorrectly in the attachment.**

Revision proof reading APJR 2013-23

No.	PDF file from author	Answer/ Revision
(1)	Figure 2 (page 3) legend had been stated incorrectly: The position of 15 references protein spots identified in the control group obtained from the 2D gel electrophoresis. The identified protein spots were appointed as references for quantification. A: Treatment group; B: Control group. The number of protein spots in the treatment group is shown to be less than the control group.	Figure 2 (page 3) legend should be stated as: 2D gel electrophoresis of sperm protein using an IPG strip. pH 3-10, stained with Coomassie Brilliant Blue (CBB). A: Treatment group; B: Control group. The number of protein spots in the treatment group is shown to be less than the control group.
(2)	Figure 3(page 4) legend had been stated incorrectly: 2D gel electrophoresis of sperm protein using an IPG strip. pH 3-10, stained with Coomassie Brilliant Blue (CBB).	Figure 3(page 4) legend should be stated as: The position of 15 references protein spots identified in the control group obtained from the 2D gel electrophoresis. The identified protein spots were appointed as references for quantification.

Dear Editors,  
 Thanks for the kindly email.  
 There are few corrections was found. Only figure 2 and 3 legend had been stated incorrectly in the attachment.

Here, attached together the revision and corrected PDF file that had been marked with yellow.

Thank you.
